DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alperovich et al (6101393) and further in view of Shaheen et al (20050048969).
- 3. Regarding claims 1,7 and 10 Alperovich et al teaches a method for restricting a message service in a communication network, wherein at least a sender and a recipient of a message communication in said network are identifiable by a respective address; said method comprising the steps of (figs. 2-6):

keeping a record containing information about certain addresses with which a message communication is not allowed (col.2, lines 5-22, col. 4, lines 30-46); deciding whether a message communication with a certain address is allowed or not, and writing information of unallowed addresses in said record, thus determining contents of said record (col. 2, lines 5-22, col. 4, lines 30-46); receiving a request for establishing a message communication (col. 2, lines 5-22, col. 4, lines 30-46); analyzing on the basis of the information in the record whether a message communication is allowed (col. 2, lines 5-22, col. 4, lines 30-46); and preventing the transmission of a message if said message is related to an unallowed address according to the analyzing step, wherein each of said decision step and said preventing step is done in said communication

Art Unit: 2686

network, and said record(col. 2, lines 5-22, col. 4, line 30-col. 5, lines 3 and see above). Alperovich et al does not specifically teach switching center of said communication network.

In an analogous art, Shaheen et al teaches steps switching center of said communication network (para. 0039 0657, fig. 2). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Alperovich et al by specifically adding features switching center of said communication network in order to enhance MSC included HLR (HLR is component of MSC) to increasing the efficiency of the communication system as taught by Shaheen et al.

Regarding claims 2,8 Alperovich et al teaches wherein one of said sender and said receiver is a message service center (col. 2, lines 5-22).

Regarding claims 3,9 Alperovich et al teaches wherein said switching center is a visited switching center, to which a terminal of a subscriber being involved in said message communication is related at a time when said message is to be transmitted (col. 4, lines 15-20 and lines 50-67).

Regarding claim 4 Alperovich et al teaches wherein said switching center is an interworking switching center (col. 2, lines 5-22, col. 4, lines 30-46).

Regarding claim 5 Alperovich et al teaches wherein said contents of said record are subscriber specific (col. 4, lines 15-25).

Regarding claim 6 Alperovich et al teaches wherein said record is common to a group of subscribers (col. 6, lines 10-20).

Response to Arguments

4. Applicant's arguments with respect to claims 1-10 have been considered but are

moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the

Examiner should be directed to Khawar Iqbal whose telephone number is (571) 272-

7909.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's

supervisor, Marsha D. Banks-Harold can be reached on (571) 272-7905. The fax phone

number for the organization where this application or proceeding is assigned is (703)

872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for published

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free) or 703-305-3028.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist/customer service whose telephone

number is (571) 272-2600.
